Project Title: Visualizing Housing Market Trends: An Analysis of Sale Prices and Features using Tableau

Project Design Phase-I - Solution Fit Template

Team ID: LTVIP2026TMIDS44140

3. TRIGGERS

TR

College project requirements, need

10. YOUR SOLUTION

SL

Develop Tableau dashboards and Flask-based web application to visualize housing price trends, renovation impact, and feature-based price analysis.

8. CHANNELS of BEHAVIOUR

CH

ONLINE —

Tableau Public, GitHub, YouTube Tutorials, Data Analytics Websites

OFFLINE —

College labs, classroom learning, project discussions with faculty

Idea

to build portfolio project, interest in data analytics and real-world dataset analysis.

Define CS, fit into CC

1. CUSTOMER SEGMENT(S)

CS

Students, Data Analysts, and Beginners learning Data Visualization who need to analyze housing market data using dashboards

6. CUSTOMER CONSTRAINTS

Large dataset size, lack of visualization knowledge, limited Tableau experience, limited system performance.

5. AVAILABLE SOLUTIONS

Excel analysis, manual data filtering, basic chart tools, online dataset visualization tools.

Explore AS, differen

Focus on J&P, tap into BE, understand RC

2. JOBS-TO-BE-DONE / PROBLEMS

Customers need to analyze housing price trends, renovation impact, and house feature influence using visual dashboards instead of raw datasets.

9. PROBLEM ROOT CAUSE

RC

Housing data is complex and raw data format makes it difficult to identify price trends and feature relationships.

7. BEHAVIOUR

BE

Customers download datasets, try Excel charts, learn Tableau online, search visualization tutorials, and build dashboards.

Focus on J&P, tap into BE, understand RC

4. EMOTIONS: BEFORE / AFTER

EM

Before → Confused, overwhelmed by raw housing dataset

After → Confident, clear understanding of housing trends through dashboards
